

Therapeutic support worker training – child focused

Create Hope is a new Christian charity based in Berkshire, offering emotional support to children and families through creative and play therapy. Create Hope has contracts with several primary schools, supporting children there as well as their families.

Are you interested in working for children, young people or families? Are you a trainee counselor looking for a placement? And/or do you hold a professional qualification? I.e. teacher, social worker etc.? If so, this could be the perfect opportunity for you.

Create Hope is recruiting volunteers to help deliver this service. In order to equip volunteers with the skills you need, Create Hope provides practical, engaging and informative in-house training. The course covers safeguarding issues, an introduction to Create Hope as an organization, working therapeutically with children, young people and families and our integrative therapy approach which is focused on creative therapy models

This training is accredited by CPD standards UK.
